

SHERLIN S

kit25cseasherlins@gmail.com | +919025602990 | [LinkedIn](#) | [GitHub](#) | Tirupur, Tamil Nadu

EDUCATION

B.E. Computer Science and Engineering | Kalaingar Karunanidhi Institute of Technology, Coimbatore | Aug 2025 – Aug 2029
(Expected)

Current CGPA: 8.14/10.0

Relevant Coursework: Database Management Systems

PROJECTS

Quiz Application with Leaderboard | [View on GitHub](#)

Stack: Python, Tkinter, JSON, Data Structures (Lists, Sorting)

- Developed a **GUI-based quiz application** using Python and Tkinter with a timed question system for real-time interaction.
- Implemented a **leaderboard using JSON** to rank users based on score and completion time.
- Built an interactive **GUI with buttons, input, and real-time updates** that ensures smooth navigation improves user experience

Personal Diary Management System | [on Github](#)

Stack: C, File Handling, Basic Security (Hashing)

- Created a Personal Diary Management System using C and file handling
- Enabled users to add, view, and delete entries with basic password security
- Demonstrated understanding of data handling, input validation, and menu-driven programs.

Expression checker | [View on GitHub](#)

Stack: Java, Stack (LIFO), Data Structures

- Developed a Balanced Parentheses Checker in Java using Stack (LIFO) to validate expressions for correct bracket usage.
- Implemented logic to detect mismatched, nested brackets for syntax validation.
- Applied data structures concepts to simulate real-world features of code editors and compilers.

TECHNICAL SKILLS

- Languages:** Java, Python, C.
- Data Structures & Algorithms:** linked list, stack, graph, Queue, Trees.
- Tools & Platforms:** Git, GitHub, VS Code, Eclipse, google colab, jupyter, leetcode, codechef.

CERTIFICATIONS

- Infosys Springboard Data structure and Algorithms using java :**
Studied essential data structures such as arrays, linked lists, stacks, queues, trees, and graphs. Learned algorithm design techniques including searching, sorting, recursion, and complexity analysis to improve problem-solving efficiency.
- Infosys Springboard C :**
Developed knowledge of fundamental programming concepts like loops, arrays, pointers, functions, and memory management. In C++, focused on object-oriented features and efficient coding practices.
- Cisco Python Essentials Certification:**
Earned Cisco Python Essentials certification, gaining strong practical knowledge in Python programming and problem-solving.

ACHIEVEMENTS

- Paper presentation, Coimbatore Institute of Technology :**
Presented a paper on Secure Login System, explaining authentication methods and basic security concepts. Gained hands-on exposure to technical presentation, public speaking, and defending ideas before judges.
- Hackathon Participation – Google AdMob Hackathon, Bombay :**
Collaborated with a team to develop “Hostel SOS”, an anonymous complaint system for hostel students to report issues safely and gained practical experience in team collaboration, idea development, and real-world problem solving.
